Appl. No. 10/625,266 Amdt. Dated January 12, 2005 Reply to Office action of October 13, 2004

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-3 (cancelled)

Claim 4 (currently amended): A magnetron drive power 1 supply comprising a commercial power supply, a high-2 frequency inverter for converting electric power of the 3 commercial power supply into high-frequency power and. 4 supplying the high-frequency power to a high-voltage 5 transformer, a high-voltage rectification circuit and a 6 magnetron being connected to secondary output of the high-7 voltage transformer, a voltage detecting means to detect 8 monitor the voltage of the commercial power 9 comprising an input current detector which detects a 10 high-frequency inverter, value of the 11 current controller for controlling the high-frequency inverter, 12 characterized in that if the detection value of the input 13 current detector has a predetermined difference from a 14 15 target value continuously for a given time, the controller stops the high-frequency inverter. 16

Claim 5 (original): The magnetron drive power supply
as claimed in claim 4 wherein the predetermined difference

Appl. No. 10/625,266 Amdt. Dated January 12, 2005 Reply to Office action of October 13, 2004

- 3 between the detection value of the input current detector
- and the target value is set in response to the target
- 5 value.
